

# SENSE PROJECTS

## SENSE On the next WAVE

Sense Projects were engaged by Knight Frank on behalf of CorVal to deliver an inspiring Lobby and End Of Trip Facility designed by HDR Rice Daubney.

We are all trying to stand out from the crowd and highlight our point of difference. Workplaces are no different and that is exactly what was achieved at 67 Albert Avenue, Chatswood with an amazing Main Foyer & Lift Lobby refurbishment that stands head and shoulders above the pack. From the moment you walk across the newly tiled external forecourt you are met with the double height glazed façade that forms the entry to the recently completed Main Foyer & Lift Lobby refurbishment. You will not be mistaken if you feel that you are walking into a piece of art. Once inside you will marvel at the ceiling and wall 'Fins' as you relax at the Lobby Café before making your way to the lifts. All the while being amazed by a pulsating light show reminiscent of the vivid festival. What a way to enter work or for clients to feel as they arrive for a meeting. Quite an Impression.

If traveling to work by bike is more of your style feel rest assured you can store your bike in the secure bike cage and feel refreshed after taking a shower in the high quality end of journey facilities fully informed and included in every stage of the project.
